

Dear St. Gregory the Great Catholic School Parents,

I'm happy to share exciting news about recent changes in your student's dining program. ARAMARK K-12 Education, your school's food service provider, in partnership with St. Gregory the Great, is transforming the cafeteria to **The Tines**.

Our proprietary research shows that today's students:

- Are busier than ever, and demand a dining experience that offers them a refreshing break in their day
- Crave "fresh" options and the ability to customize their meals
- Desire bright color schemes and images of "real food"
- Demand speed of service, an appealing food presentation and a retail-like dining environment

At **The Tines**, fun, energetic colors canvas the cafeteria and food photography highlights the variety of freshly prepared offerings available every day. On a rotating basis, made-to-order feature stations will offer students the ability to experiment with fresh ingredients and flavor combinations. Sample stations include Deli, Salad, Mexican and Burger to meet the wide range of taste preferences among the students.

Recipes have been developed to appeal to the more sophisticated tastes. They not only meet but also exceed the USDA guidelines that govern the National School Lunch Program.

I personally invite you to visit the **The Tines** to see first-hand the exciting changes that have been implemented for your students at St. Gregory School.

Please call me at 419-552-7655 if you have any questions or comments.

Thank you,

Stacie M. England
Food Service Director
